User Profile

Profile Information split into four "cards", each representing a different grouping of data, with switchable tabs

Custom movie watch lists created by the user.

"custom" allows you to select a list of one of your custom lists to view progress for that list specifically

Selecting tabs at the top of each card switches card information to display. E.g, selecting 'Movies Watched' will show a scrollable list of all movies watched by the user

'My Stats' features user statistics such as favourite genre, total watch time, watch time remaining etc.

This card features searchable and scrollable list of friends, hyperlinking their own user profiles, pending friend requests and reccommended friend requests

"overall" tab features progress bar representing total movie watched progress, with a graphic of a popcorn container being filled, with the popcorn level also representing movie watched progress
